

Jones Associates is a London-based practice providing full architectural services for bespoke residential projects in the capital and across the UK

Since its inception in 2001, it has established a reputation for combining outstanding design with the highest level of professional service.

Approach

When approaching each project our aim is to provide a sensitive, creative response not only to the needs and aspirations of the individual client but also to the unique opportunities presented by each site.

We believe that building a trusting, communicative relationship between architect and client is key to a project's successful realisation. The success of this approach is reflected in the large number of established clients who re-commission Jones Associates for subsequent projects and who recommend us to new clients.

Services

We prefer to oversee each project from inception to completion. Equal emphasis is placed upon all stages of the process, from the initial design stage, through detail design, and on to the construction phase.

While design quality is central to our approach, we also ensure that more pragmatic issues such as cost and timescale are brought into the process at an early stage and continue to be reviewed throughout the life of a project.

Client references can be arranged on request.
